

# *Student Theatre - High School Only*

High School students will bring to life their own stage production by stepping into the roles of Director, Choreographer, Stage Manager, and Designers while being guided by our professionals.

During the course of this 10-week class, students will learn how to dream up, design, and create their own production which will be performed at the end of the course.

Classes are 90 mins long but are broken up throughout the semester. Depending on the role each student is assigned will determine how often the student will need to be in attendance. Some roles will only meet occasionally (designers) while others will have to meet weekly (director). \*Students interested in participating as cast members should not enroll in this class.

Classes taught by Santana Carlton
